

Mobilszoftver laboratórium 4.

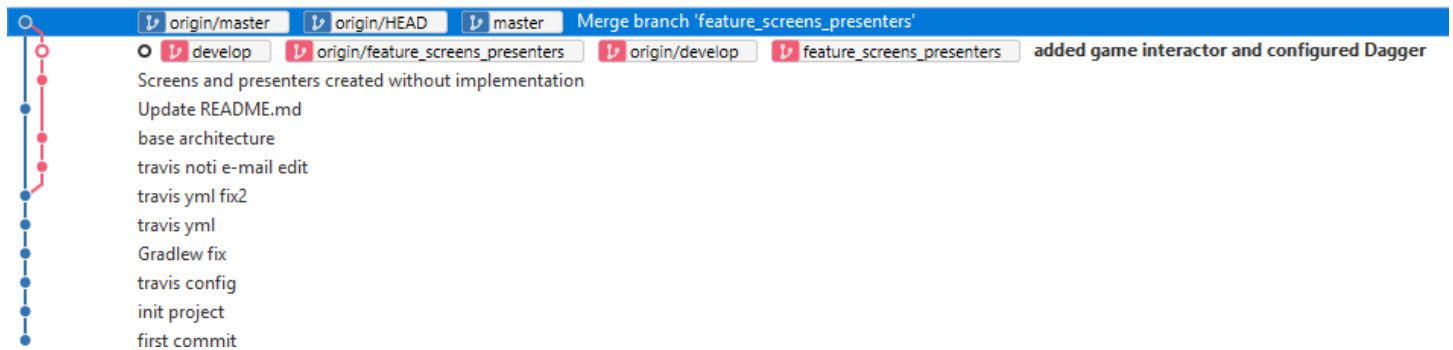

Architektúra

Kálmán Bence

B06FMG

Git

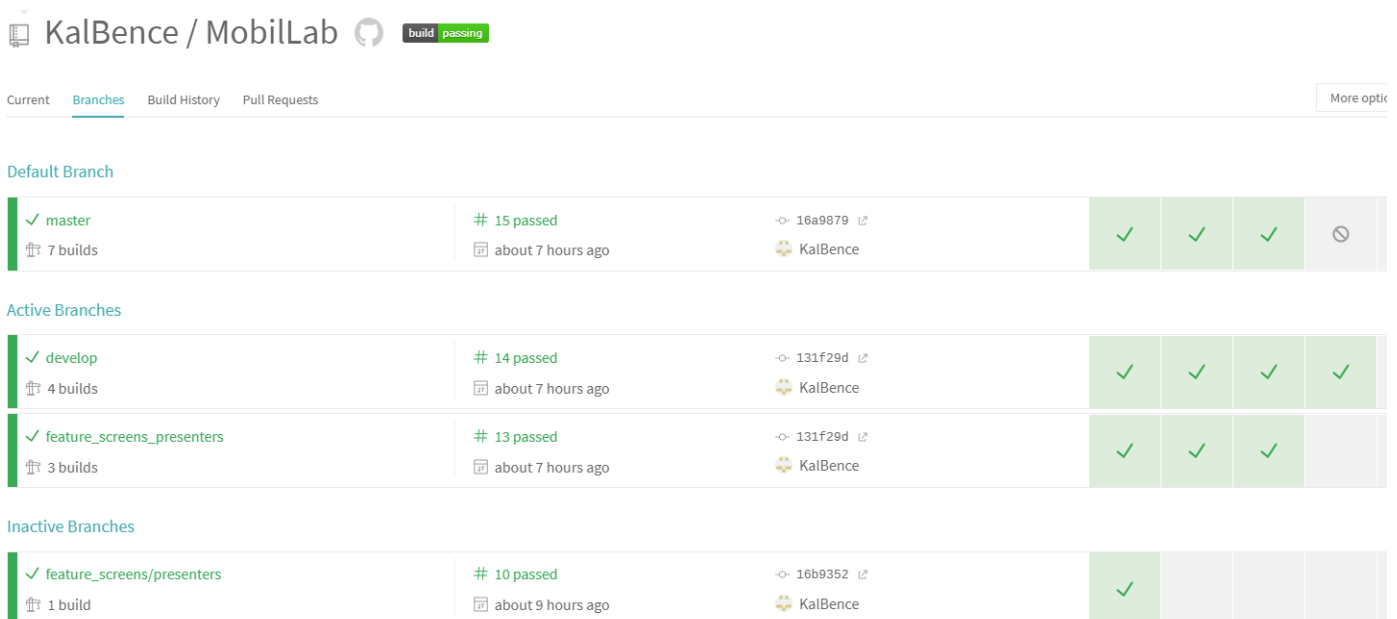

Repo: <https://github.com/KalBence/MobilLab>

Az repo létrehozása és a Travis konfiguráció után létrehoztam a develop branchet. Ezen az alap architektúra létrehozása után létrehoztam a „feature_screens_presenters” feature branchet. Ezt a munka végeztével vissza mergeltem a develop branchre majd a develop branchet a masterbe.

Travis CI
